

Maulana Ganda Wijaya

+62 899 9228 241 | maulanagandawijaya@gmail.com | [Cimahi, Indonesia](#)

[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Enthusiastic IT professional specializing in Full-Stack Development, Mobile Development, and Application Security with more than four years of experience across F&B, healthcare, distribution, manufacturing, and cooperative sectors. Experienced in end-to-end delivery, API integration, deployment, troubleshooting, infrastructure support, and controlled security assessment.

EXPERIENCE

Web Developer & Security

Apr 2025 - Present

PT. Champ Resto Indonesia Tbk, Bandung

- Develop and maintain business applications for voucher management, POS, MRP, purchasing, CRM, Learning & Development, and event operations.
- Build full-stack workflows with Nuxt.js, Vue.js, Laravel, TypeScript, PHP, MySQL, dashboards, reporting, and multi-level approvals.
- Perform application security assessments and penetration testing, validate risks in a controlled manner, and provide remediation guidance.

IT Staff

Aug 2024 - Dec 2024

PT. Mitra Medika Sejati (RSU Kasih Bunda), Cimahi

- Developed an internal doctor scheduling application and managed the hospital website, SIMRS, servers, networks, and IT support.
- Maintained hardware and software while troubleshooting incidents to keep hospital operations stable.

IT Staff Programmer

Jun 2024 - Aug 2024

PT. Sapta Sari Tama, Bandung

- Developed and maintained a CodeIgniter 3 ERP for pharmaceutical and medical-device distribution.
- Handled optimization, troubleshooting, and bug fixing across inventory, purchasing, sales, and reporting modules.

Web Developer

Jan 2023 - Apr 2024

PT. Qtasnim Digital Teknologi, Bandung

- Developed Flutter mobile applications and Electronic Medical Record systems using CodeIgniter, Ext JS, and PostgreSQL.
- Implemented BPJS bridging, supported EMR upgrades, and collaborated on deployment and troubleshooting across 7+ healthcare projects.

IT Staff

Jul 2022 - Dec 2022

PT. Unggul Bukit Kencana, Bandung

- Developed a QR-based factory security checkpoint and patrol reporting application.
- Managed Ubuntu servers, networks, databases, Node.js applications, backups, IT support, and Haiwell PLC/HMI monitoring.

Freelance Web Developer

Nov 2021 - Mar 2022

Koperasi PT. INTI, Bandung

- Built a centralized web-based POS for food-court cashier operations, inventory, revenue sharing, and sales monitoring.
- Enabled management to review transactions, financial data, and operational reports more efficiently.

EDUCATION

Sekolah Tinggi Teknologi Bandung

Oct 2017 - May 2022

Bachelor's Degree in Informatics Engineering, Bandung

- Major: Computer Network Security | GPA: 3.37 (Very Excellent)
- Thesis: Android and web-based E-Voting application using Flutter, CodeIgniter, and MySQL | Grade: A

SELECTED PROJECTS

- **Point of Sale Pujasera - Koperasi PT. INTI (2022)**
Centralized cashier, inventory, revenue-sharing, receipts, users, and sales reporting.
- **Electronic Medical Record (EMR) (2023-2024)**
Hospital EMR for outpatient, inpatient, emergency, nursing, queues, supporting services, and BPJS integration.
- **Hospital Mobile Application (Q-HOPES) (2023)**
Flutter patient services for hospital information, doctor schedules, booking, and bed availability.
- **E-Voting Application Research (2021)**
Android and web voting platform with candidate data, voting, and result dashboards.
- **Company Profile Website - Koperasi PT. INTI (2022)**
Public company profile and CMS for business units, articles, gallery, organization structure, and messages.
- **Security Checkpoint Patrol System (2022)**
QR checkpoint patrol workflow with proof photos, schedules, reporting, and role-based access.
- **ERP Distribution - Pharmaceutical & Medical Devices (2024)**
ERP for products, warehouse stock, purchase orders, sales distribution, expiry monitoring, and reports.
- **Doctor Scheduling Application (2024)**
Hospital doctor scheduling with calendar views, specialties, quotas, notifications, and dashboards.
- **Corporate Voucher Management (2025-2026)**
Production voucher platform for stock, distribution, outlet sales, redemption, activation, analytics, and exports.
- **POSMCC V2 (2025-2026)**
Call-center POS for new transactions, order tracking, receivables monitoring, reports, and closing.
- **Material Requirement Planning (MRP) (2025-2026)**
Procurement hub for purchase requests, cash advance, MRP, umbrella contracts, budget control, and approvals.
- **PO Purchasing System (2026)**
Purchase Order dashboard, filtered PO lists, approval history, values, statuses, and progress monitoring.
- **Customer Relationship Management (CRM) (2026)**
Daily customer delivery, order forecasting, follow-up monitoring, outlet performance, and regional filters.
- **Learning & Development Video Platform (2026)**
Training video and quiz platform with audience targeting, publication periods, monitoring, and exports.
- **Event Point of Sale (POS) (2026)**
Event transaction dashboard for outlets, devices, payments, menu sales, portions, taxes, and reports.
- **Application Security Assessment (2025-2026)**
Controlled penetration testing, risk analysis, evidence review, and remediation guidance with findings redacted.
- **Baregad Sparepart E-Commerce (2026)**
Responsive storefront with search, filters, product detail, compatibility, reviews, WhatsApp conversion, and admin operations.
- **RSUD Otista Mobile (SIPANTES) (2026)**
Flutter patient-services application with guest/auth flows, booking, consultation, hospital information, and a read-only Go API.

PROJECT COVERAGE

- Web and mobile product delivery from requirement analysis, interface implementation, API integration, testing, deployment, and maintenance.
- Enterprise workflows for sales, vouchers, procurement, production planning, purchasing, customer management, learning, and event operations.
- Healthcare technology covering EMR, mobile patient services, doctor schedules, queues, booking, BPJS bridging, and hospital IT operations.
- Dashboard and reporting work using searchable tables, filters, exports, charts, status monitoring, and role-based access.
- Database and infrastructure support across MySQL, PostgreSQL, Linux/Ubuntu Server, Docker, networking, backup, and troubleshooting.
- Security-focused documentation with controlled testing, risk analysis, evidence handling, privacy protection, and remediation recommendations.

PROJECT HIGHLIGHTS

Baregad Sparepart E-Commerce

- Built with Next.js 16, React 19, TypeScript, and Tailwind CSS 4 using storefront and admin-console separation.
- Includes catalog search/filter/sort, compatibility data, stock, reviews with images, product detail, WhatsApp conversion, SEO, and backend gateway patterns.

RSUD Otista Mobile (SIPANTES)

- Flutter mobile application using BLoC/repository architecture for guest and authenticated patient-service flows.
- Go Fiber and MySQL read-only API supports metadata validation, parameter binding, search, pagination, and REST access.

Enterprise Applications - PT Champ Resto Indonesia

- Maintain production systems spanning POS, voucher operations, procurement, MRP, purchasing, CRM, Learning & Development, and event management.
- Work includes UI/API integration, dashboards, reports, data workflows, deployment support, troubleshooting, and security review.

Application Security Assessment

- Conduct controlled vulnerability assessment and penetration testing aligned with OWASP practices.
- Document scope, evidence, risk, business impact, and remediation while redacting credentials, endpoints, payloads, and sensitive findings.

CORE EXPERTISE

Frontend: JavaScript, TypeScript, React, Next.js, Vue.js, Nuxt.js, HTML, CSS, Tailwind CSS

Backend & API: PHP, Laravel, CodeIgniter, Go Fiber, Node.js, Python Flask, Java, REST API, BPJS bridging

Mobile: Flutter, Dart, BLoC, Android application delivery

Database: MySQL, PostgreSQL, relational modeling, reporting, query troubleshooting

Infrastructure: Linux/Ubuntu Server, Docker, networking, deployment, backup, Git

Security: Application Security, Penetration Testing, OWASP, risk analysis, remediation

ADDITIONAL INFORMATION

- Courses: CCNA, Project Management Associate, Forsec Security, TOEFL
- Languages: Indonesian, English, Sundanese
- Interests: Technology, security research, product development, games, and movies
- Portfolio: maulana-gandawijaya.my.id | LinkedIn: linkedin.com/in/maulanagw | GitHub: github.com/necrology

DELIVERY & PROFESSIONAL STRENGTHS

- Translate operational requirements into structured and maintainable web or mobile workflows.
- Work across modern and legacy stacks while preserving stability in production environments.
- Design integrations between user interfaces, REST APIs, relational databases, and external services.
- Build dashboards and reports that help teams monitor status, transactions, performance, and approvals.
- Handle deployment support, incident troubleshooting, application maintenance, and infrastructure coordination.
- Collaborate with business, hospital, and operational teams to validate requirements and resolve issues.
- Protect confidential information by redacting customer, employee, financial, credential, and assessment data.
- Communicate findings through clear documentation, practical remediation steps, and traceable project evidence.

INDUSTRY EXPOSURE

- Food & Beverage and multi-outlet operations
- Hospitals, patient services, EMR, and healthcare integration
- Pharmaceutical and medical-device distribution
- Manufacturing, security patrol, infrastructure, and cooperative services
